

Jasper County Courthouse

Brochure Section: Building Envelope Services

Project Title: (*Etica project #1213*)

Roof Work at Jasper County Courthouse

Rensselaer, Indiana

Key Elements:

- 2012 Construction Cost: \$1,150,000
- Roof Design
- Construction Administration and Observation Services

Project Summary:

In the spring of 2102, **Etica Group, Inc.** was retained to provide professional Roof Consulting Services for the Jasper County Courthouse in Rensselaer, Indiana. The existing roof on the main courthouse building was a standard three tab asphalt shingle roof, installed in the 1980s. This was the second asphalt shingle roof that was installed on this building. The first one was installed in the 1970's and replaced the original slate roof.

The current shingle roof system has reached the end of its life expectancy and after utilizing two consecutive asphalt shingle roofs in the past, the commissioners wanted to restore the courthouse roof to the original slate roof. **Etica Group, Inc.** started with an evaluation of the existing roof system and structure, which included developing "as-built" details of the existing conditions and worked with the owner in deciding on color and style. **Etica Group, Inc.** then prepared design and bidding documents for the commissioners to receive quotes.
